LOGO VARIATIONS

Our logo is more than just a symbol – it's a visual embodiment of our brand identity and core values. To maintain consistency and impact across all touchpoints, it must be used with care and in accordance with the following guidelines:

- Proper Use of Color

The logo should always be used in its primary brand colours – ensuring it remains bold, clear, and aligned with our colour palette. Avoid altering or distorting the logo's colours in any way.

- Scale and Proportions

Always maintain the integrity of the logo's scale and proportions. Do not stretch or compress the logo, as this will compromise its visual appeal and recognition.

- Clear Space

Adequate white space around the logo is essential to ensure it stands out and maintains its impact. Always keep a clear space equal to the height of the horizontal logo's wording "High" on all sides.

- Backgrounds

Ensure the logo is displayed on a contrasting background to maintain its visibility. Avoid using the logo on busy or cluttered backgrounds that could compromise legibility.

TYPOGRAPHY

Typography plays a crucial role in conveying the energy, professionalism, and clarity of JJ's High Performance. By using a combination of **Bebas Neue** for headings and **Rubik** for everything else, we create a cohesive visual identity that is both bold and readable, reflecting our high-performance ethos.

These are general guidelines, exact sizes may vary depending on the medium (web, print, etc.), but this provides a starting point for creating a cohesive design system

SECONDARY TYPEFACE: RUBIK

Paragraph Body Text (14-16px)

For general content, articles, and explanations. Rubik ensures readability and clarity for all body text.

Subheadings (18-20) [medium]

Subheadings within paragraphs to break down content into easily digestible sections.

Captions/Labels (12-14px)

Small text such as image captions, footnotes, or labels.

PRIMARY TYPEFACE: BEBAS NEUE

H1. HEADING (48-60PX)

Used for major titles, landing page headers, or key marketing statements.

H2. SUB-HEADLINE (36-44PX)

Subsections within pages, key program titles, or important points that need emphasis.

H3. SECTION TITLES (28-32PX)

Used for section headings within content (e.g., Features, About Us).

TYPOGRAPHY SPACING

- **Headings:** Ensure there is a generous amount of space between headings and body text to create visual separation. A line height of 1.2 - 1.4x so the font size works well.
- **Body Text:** For paragraphs, use a line height of 1.5x the font size to ensure readability, especially for longer content.

BUTTONS & CTAS

Keep CTAs bold and prominent

“JOIN NOW” - BEBAS NEUE

“Learn More” - rubik medium

EXAMPLE LAYOUT

This layout allows for a clean, structured approach, making sure the bold, attention-grabbing headings stand out while keeping the content clear and easy to read.
